

XC BREATHBOX (USE AND ADJUSTMENT)

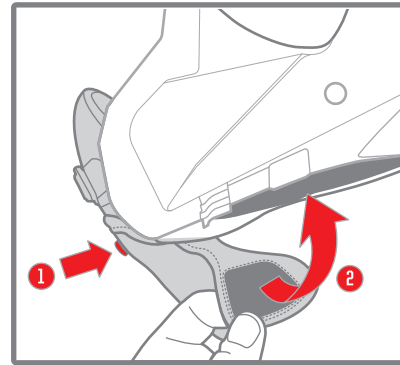

THE PRE-INSTALLED BREATHBOX IS INTENDED TO CAPTURE AND REDIRECT THE RIDER'S HOT/HUMID BREATH AWAY FROM THE SHIELD'S INNER SURFACE. THIS, WHEN COMBINED WITH EITHER A DUAL LENS OR ELECTRIC SHIELD DRAMATICALLY REDUCES FOG AND FROST. TO ADJUST, SIMPLY CONNECT THE FRONT SNAP AND PULL EQUALLY ON EACH STRAP END TO APPLY THE APPROPRIATE AMOUNT OF PRESSURE. THE RUBBER MASK WILL ACT AS AN ADJUSTABLE FORM FITTING GASKET.

SCORPION EXO®

front

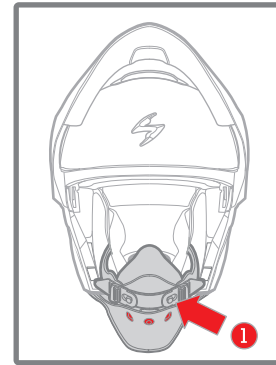

XC BIB (USE AND ADJUSTMENT)

ALSO INCLUDED WITH YOUR HELMET IS THE XC BIB WHICH KEEPS COLD AIR AWAY FROM YOUR CHIN AND NECK. IT ALSO HELPS TO EXHAUST THE RIDER'S BREATH BY KEEPING INCOMING AIR FROM BEING FORCED UP AND INTO THE BREATHBOX AREA.

TO INSTALL: 1) CONNECT THE RED SNAPS ON THE BIB TO THE RED SNAPS ON THE BREATHBOX. 2) NEXT ATTACH THE VELCRO ON THE BIB TO THE VELCRO ON THE CHEEK PAD BOTTOM.

XC SYSTEM (DESIGNED FOR MODULAR)

THE XC BREATHBOX IS ATTACHED TO THE MAIN SHELL, NOT THE CHIN BAR. THIS ALLOWS YOU TO OPEN THE CHIN BAR WITHOUT READJUSTING THE BREATHBOX. WITH THE CHIN BAR UP, 1) SIMPLY UNCLIP THE BREATHBOX STRAP FOR EASY ACCESS AND RECLIP WHEN DONE. NO ADDITIONAL ADJUSTMENT NEEDED.
